RTP Corporation and Pegasus Technologies Join Forces to Promote Boiler Optimization Products

POMPANO BEACH, Fla.—August 27, 2002—RTP Corporation, supplier of high performance hybrid control systems, and Pegasus Technologies, Inc., the leading source of combustion optimization solutions for the power industry, recently announced their strategic alliance to develop and market optimization products for gas and oil-fired boilers.

Working together, RTP and Pegasus will deliver system configurations with non-redundant and redundant hardware options offered in a rack mountable version that features options such as mirrored hot swappable hard drives, redundant power supplies, and multi-CPU processors.

RTP management expressed its enthusiasm about the relationship with Pegasus and RTP Corp. becoming a value-added reseller of Pegasus Technologies. “We’re excited about partnering with Pegasus, as the relationship gives RTP the ability to penetrate and increase its reach into the fossil power generating market,” noted Sal Provanzano, president of RTP Corporation.

Gary Nicholson, CEO of Pegasus, says of the partnership, “We are really pleased to be selected as optimization software of choice by RTP,” said Gary Nicholson, CEO of Pegasus Technologies Inc. “This is yet another endorsement of our suite by a controls systems OEM.”

About KFx/Pegasus

KFx provides total fuel solutions for the power industry. Its patented K-Fuel process converts low heating value coal into clean, high-energy fuel. The KFx Web site address is www.kfx.com. Pegasus Technologies, Inc., a majority-owned subsidiary of KFx, is a leading provider of neural network based optimization and control applications for the power generation market. The

About RTP Corporation

Founded in 1968, RTP Corp. is a developer and manufacturer of high-performance industrial data acquisition and control systems. Markets for RTP Corp.'s products include process control (steel, aluminum, and glass), flight simulation, nuclear power plant simulation and data acquisition, petrochemical, fossil fuel power plant control, factory automation, and research and development testing. RTP offers a wide range of rugged hardware and software industrial control solutions, which include hot standby and seamlessly redundant systems for mission-critical applications. All RTP products—even those installed over 30 years ago—are backed by a non-obsolescence policy that protects customer investments from the constant threat of technological change. RTP is headquartered in Pompano Beach, FL and is located on the Internet at www.rtpcorp.com.
